Subject: lane plating field work.

Lane Plating Team,

FYI on plans for Phase 2 field work at Lane Plating.

Ed,

You can tell the CAG about this at your Friday meeting. You can also tell them we are currently reviewing the phase 2 sampling plan. The phase one data report has been reviewed and will be released to the website as soon as a few things are revised. It will probably be about 2 weeks.

Subject:

Mr. Shewmake:

I wanted to give you a heads up that I've gone ahead and scheduled the Phase 2 RI field event for the weeks of 13 January 2020 and 20 January 2020, with a follow up groundwater sampling event (week to be determined). This is within the timeframe of what I projected in the Revised Work Plan and Cost Estimate Schedule, with the difference being that right now I can reserve the number of experienced field crews I need to complete the field work like was done during Phase 1. And I also met with the drilling subcontractor this morning, and they also have us down for those two weeks.

I'm thinking this schedule will also allow time for the SAP Addendum to be finalized, as well as getting the laboratory requests into Myra and Christy by no later than the first part of December, as they want the paperwork the month prior to the planned sampling event.

Please let me know if you have questions or comments.

Thank You,
Mark Paddack
EA Project Manager
